

## Back to Creation:

Judaism, Ecology, and Our Planet's Future.

Vortrag von Arthur Green

Arthur Green, amerikanischer Rabbiner, Chassidismus-Forscher und Schlüsselfigur eines neo-chassidischen Zugang zum Judentum, ist zu Besuch in der Schweiz. Seinen Vortrag hält er auf Englisch. Er schreibt dazu: «The Jewish faith in Creation was a topic largely ignored in 20th century Jewish thought, due to awkwardness about our response to scientific approaches, especially evolution. In the new century, these conflicts have been resolved in the favor of science, but faith in creation is more important than ever, due to the environmental crisis. How do we re-tool this key aspect of Judaism in a way that will make sense to contemporary seekers?»

Donnerstag, 21. Juni, 19.00.

Ort: Haus der Religionen. Eintritt frei, Kollekte.

Anschliessend kosher-ayurvedischer Apéro.
